

## THE HABITAT PENANG HILL

The Habitat Penang Hill is an eco-park featuring attractions that include a 1.6km Nature Trail originally built by the British in the early 1800s. Environmentally friendly Canopy Bridges, Walkways and Zip-Lines provide visitors with access to the forest canopy. While the Tree Top Walk, Curtis Crest, offers unparalleled 360-degree panoramic views of Penang Island, the Malaysian Mainland and the Straits of Malacca. Visitors will find themselves immersed in the natural beauty of a 130 million year old rainforest, marveling at the tremendous biodiversity of flora and fauna that call The Habitat home. The Habitat offers the most complete and accessible Malaysian rainforest experience, in a cool and pristine highland forest reserve that has been protected since 1911, a mere 6km and a short 5 minute funicular train ride from downtown George Town.
